1 Introduction

This document demonstrates a basic LaTeX setup with paragraphs, line breaks, and some text formatting.

2 Plain Paragraphs

This is a normal paragraph in LaTeX. It will wrap naturally based on the line length. You can type freely, and LaTeX will take care of the formatting.

3 Line Breaks and Indents

A new paragraph is started by leaving a blank line.

Here is another paragraph.

To force a line break without starting a new paragraph, use two backslashes: This is the second line.

4 Text Formatting

You can use **bold**, *italic*, and <u>underlined</u> text.

5 Lists

- This is an unordered item
- Another one

1. First ordered item
2. Second item
